

COVID-19 Update

Omega Laboratories wants to reassure our clients, partners, and donors that we are taking extra precautions to ensure the health and wellness of everyone who interacts with us and depends on our laboratory testing services every day.

Due to the nature of our business as a forensic drug testing facility, Omega has been able to maintain operations at full capacity and we are processing and reporting specimens with our normal speed and efficiency. Because of our advanced digital and secure fax reporting systems, you can always be assured that you are receiving your results in a secure and safe manner.

We have always been a leader in our industry when it comes to keeping our facilities clean and safe for our employees. Omega has stepped up our cleaning routine to better protect our employees, including using a virucide cleaning product that kills 99.9% of germs. We are also utilizing isopropyl alcohol, bleach and a commercial/hospital grade disinfectant to clean and sanitize, where prudent.

Omega has been closely watching the developing COVID-19 crisis and trying to react as best as possible. We have been following the state announcements, federal decisions, and recommendations from the CDC and the World Health Organizations and are making intelligent decisions every day to best protect our employees, clients, and the community.

During this time, we ask each of you to do your part to protect yourselves, your families, your coworkers, and your community. Make sure you follow the guidelines that are being provided by the state and federal government, as well as the CDC. Wash your hands, avoid touching your face, and limit physical contact wherever you can. Call your healthcare professional if you develop symptoms, have been in close contact with a person known to have COVID-19, or if you have recently traveled from an area with [widespread or ongoing community spread of COVID-19](#). We would also like to thank all the healthcare professionals, first responders, and other essential personnel who are working hard to protect our country during this time.

Through all of this, we are committed to keeping Omega open and doing business. With all this stated, things are also changing rapidly throughout the country, and decisions will continue to be made in response to these developments. If any major changes occur or seem imminent, we will notify our clients and partners a timely fashion. We thank you for your understanding.
